Product Description

This comfortable white T-shirt is a perfect choice for everyday wear. It has a simple and clean design that makes it suitable for different occasions.

Made for comfort and style, this T-shirt can easily be paired with jeans, trousers, shorts and sneakers. Its classic appearance makes it a useful addition to any casual wardrobe.

The lightweight fabric makes it comfortable to wear throughout the day. Whether you are going out with friends, attending university or relaxing at home, this T-shirt provides a simple everyday look.

The white colour gives it a versatile appearance and allows you to combine it with different colours and clothing styles. You can also wear it under a jacket or sweatshirt during cooler weather.

This product is designed for people who prefer simple, comfortable and easy-to-style clothing. Its classic design makes it suitable for regular use and different casual outfits.

Fabric and Care

- 100% combed cotton, medium weight
- Machine wash cold with similar colours
- Do not bleach
- Tumble dry on low heat
- Iron on low heat if needed

Sizing

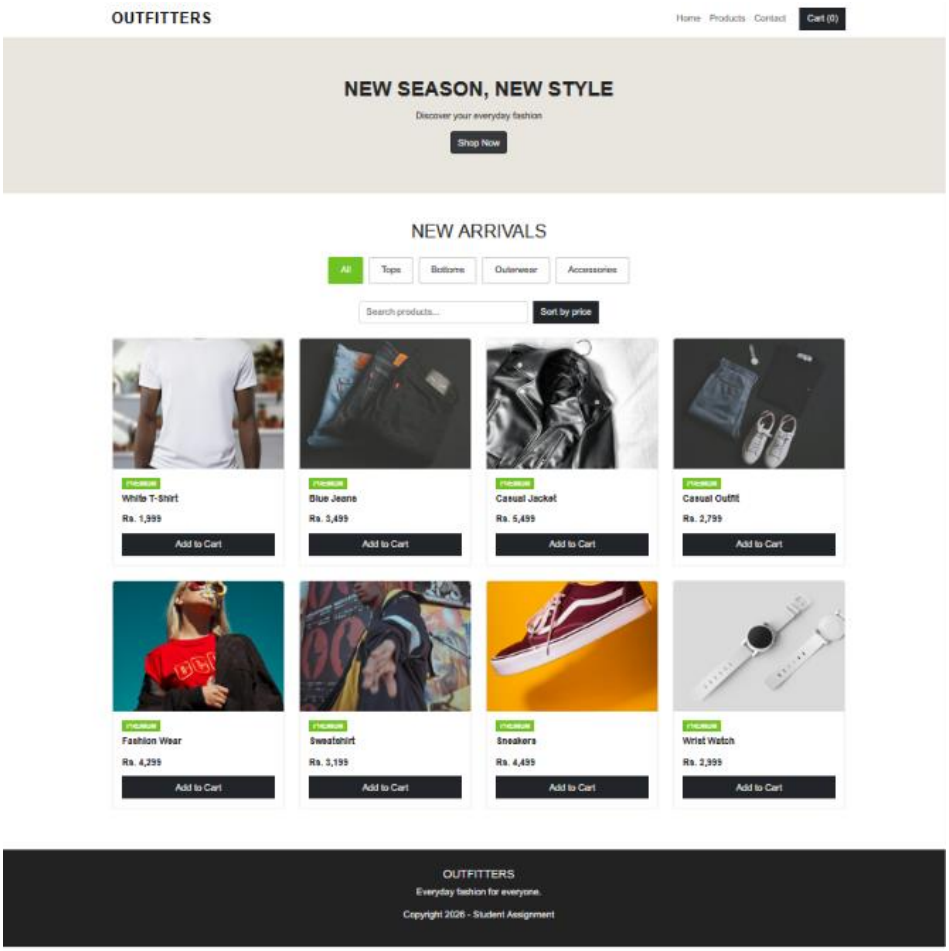

Available in S, M, L and XL. The fit is regular, so if you prefer a looser style we suggest going one size up. Please check your chest measurement before ordering to get the best fit.

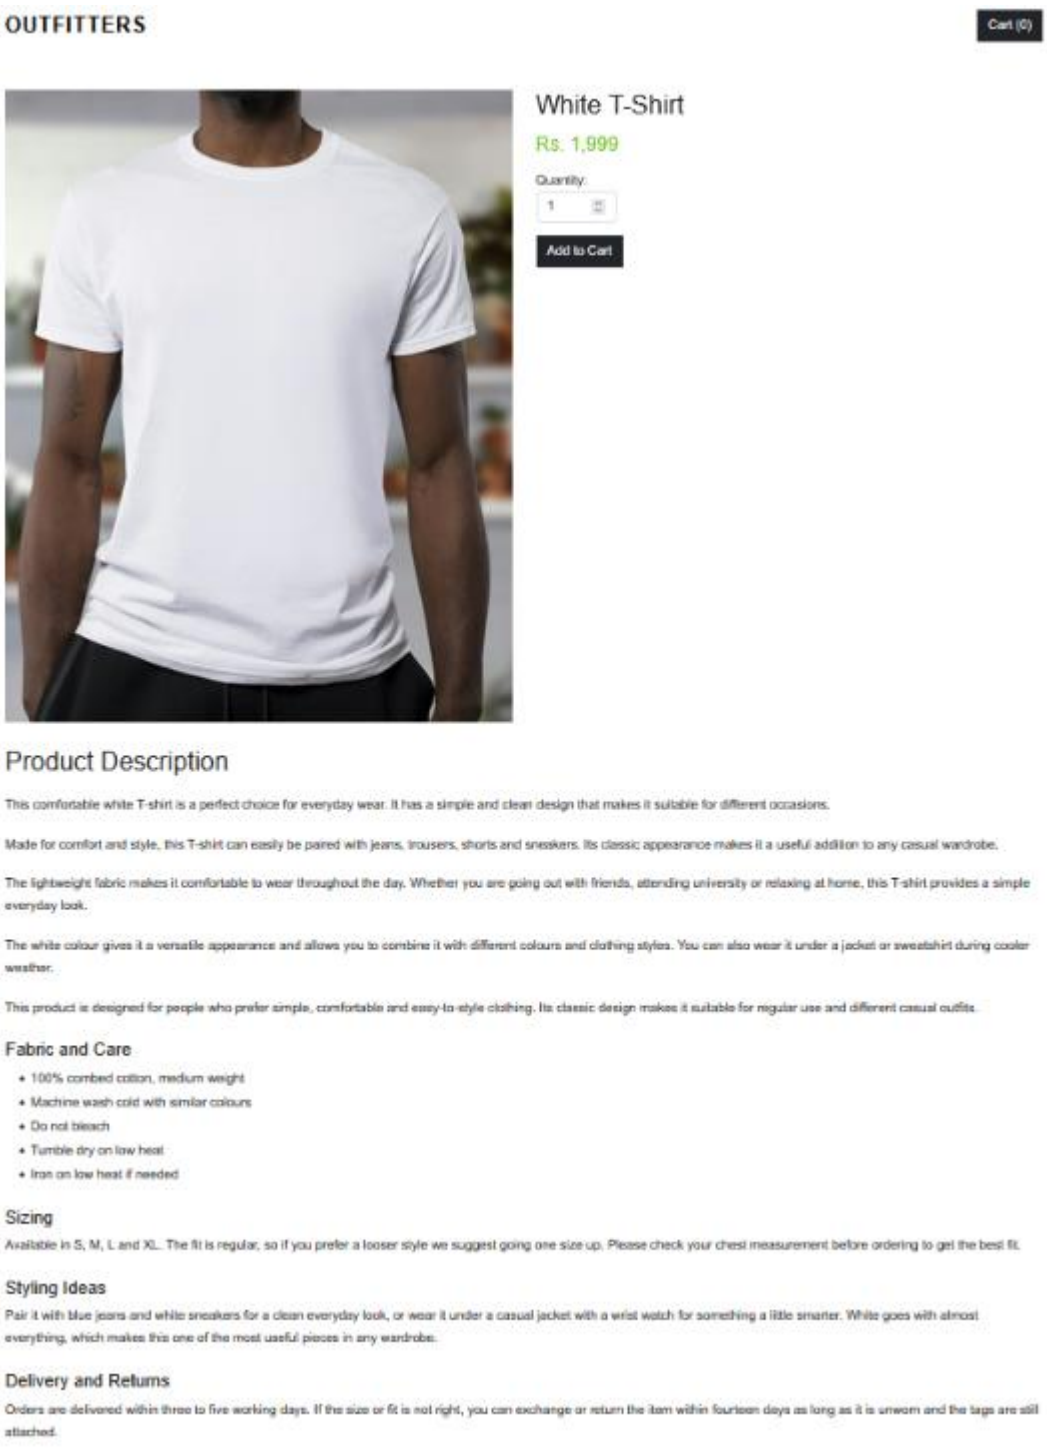

Styling Ideas

Pair it with blue jeans and white sneakers for a clean everyday look, or wear it under a casual jacket with a wrist watch for something a little smarter. White goes with almost everything, which makes this one of the most useful pieces in any wardrobe.

Task 1 - CSS-only category filter

index.html (radio buttons and labels, above the product grid)

html

```
<div class="category-section">

  <!-- Radio Buttons -->
  <input type="radio" name="category" id="all" checked>
  <input type="radio" name="category" id="tops">
  <input type="radio" name="category" id="bottoms">
  <input type="radio" name="category" id="outerwear">
  <input type="radio" name="category" id="accessories">

  <!-- Category Filter Labels -->
  <div class="category-filters">
    <label for="all">All</label>
    <label for="tops">Tops</label>
    <label for="bottoms">Bottoms</label>
    <label for="outerwear">Outerwear</label>
    <label for="accessories">Accessories</label>
  </div>

  <!-- Product Grid -->
  <div class="row" id="productGrid">
```

index.html (every product card got a category, for example)

html

```
<div class="col-6 col-md-4 col-lg-3 mb-4 product-item" data-category="tops">
```

Categories used: White T-Shirt, Casual Outfit, Fashion Wear and Sweatshirt are `tops`. Blue Jeans is `bottoms`. Casual Jacket is `outerwear`. Sneakers and Wrist Watch are `accessories`.

styles.css

css

```
/* Hide radio buttons */
.category-section input[type="radio"] {
  display: none;
}

/* Arrange filter buttons */
.category-filters {
  display: flex;
  justify-content: center;
  flex-wrap: wrap;
  gap: 10px;
  margin-bottom: 30px;
}

/* Style filter labels */
.category-filters label {
  padding: 10px 20px;
  border: 1px solid #ccc;
  border-radius: 4px;
```

```
  cursor: pointer;
  transition: 0.2s;
}

/* Hover effect */
.category-filters label:hover {
  color: hsl(91, 70%, 45%);
  border-color: hsl(91, 70%, 45%);
}

/* Selected filter button */
#all:checked ~ .category-filters label[for="all"],
#tops:checked ~ .category-filters label[for="tops"],
#bottoms:checked ~ .category-filters label[for="bottoms"],
#outerwear:checked ~ .category-filters label[for="outerwear"],
#accessories:checked ~ .category-filters label[for="accessories"] {
  background-color: hsl(91, 70%, 45%);
  color: white;
  border-color: hsl(91, 70%, 45%);
}

/* FILTER PRODUCTS */
#tops:checked ~ #productGrid .product-item:not([data-category="tops"]),
#bottoms:checked ~ #productGrid .product-item:not([data-category="bottoms"]),
#outerwear:checked ~ #productGrid .product-item:not([data-category="outerwear"]),
#accessories:checked ~ #productGrid .product-item:not([data-category="accessories"]) {
  display: none;
}
```

Task 2 - Product page layout with sticky details box

product.html (the product section; the navbar and footer are unchanged)

html

```
<main class="container my-5">

  <div class="product-layout">

    <!-- Product Image -->
    <div class="product-image">
      <img
        src="https://images.unsplash.com/photo-1521572163474-6864f9cf17ab?w=800"
        alt="White T-Shirt">
    </div>

    <!-- Product Details -->
    <section class="product-details">
      <h1>White T-Shirt</h1>
      <h4>Rs. 1,999</h4>
      <label for="quantity">Quantity:</label>
      <input type="number" id="quantity" value="1" min="1" max="10"
          class="form-control mb-3">
```

```
        <button type="button" class="btn btn-dark">Add to Cart</button>
      </section>

      <!-- Product Description -->
      <section class="product-description">
        <h2>Product Description</h2>
        <!-- 5 paragraphs, then: Fabric and Care (list), Sizing,
             Styling Ideas, Delivery and Returns, Our Promise -->
      </section>

    </div>
</main>
```

For the PDF, paste the full description text from your `product.html` instead of the comment.

styles.css

CSS

```
/* Product Grid Layout (below BP: one column) */
.product-layout {
  display: grid;
  grid-template-columns: 1fr;
  grid-template-areas:
    "image"
    "details"
    "description";
  gap: 30px;
}

.product-image {
  grid-area: image;
}

.product-image img {
  width: 100%;
  aspect-ratio: 4 / 5;
  object-fit: cover;
  display: block;
}

.product-details {
  grid-area: details;
}

.product-description {
  grid-area: description;
  line-height: 1.8;
}

.product-description h3 {
  margin-top: 25px;
  font-size: 22px;
}
```

```
/* RESPONSIVE LAYOUT - BP = 600 + 13 = 613px */
@media (min-width: 613px) {

  .product-layout {
    grid-template-columns: 1fr 1fr;
    grid-template-areas:
      "image details"
      "description description";
    gap: 30px;
    align-items: start;
  }

  /* Sticky Product Details: (13 mod 40) + 70 = 83px */
  .product-details {
    position: sticky;
    top: 83px;
  }
}
```

The other rules in your Task 2 section (`h1`, `h4`, `input`, `button`, description `h2` and `p`) are unchanged from your file. Include them too if you want the PDF to show everything.

Task 3 - JavaScript live search and price sort

index.html (added between the filter labels and `<!-- Product Grid -->`)

html
```
<!-- TASK 3: Search box and Sort button -->
<div class="search-sort d-flex flex-wrap justify-content-center gap-2 mb-4">
  <label for="searchBox" class="visually-hidden">Search products</label>
  <input type="search" id="searchBox" class="form-control" placeholder="Search products...">
  <button type="button" id="sortBtn" class="btn btn-dark">Sort by price</button>
</div>

<!-- TASK 3: Message shown when no product matches -->
<p id="noResults" class="text-center fs-5 d-none">No products found</p>
```

index.html (before `</body>`, after the Bootstrap script)

html
```
<script src="script.js"></script>
```

styles.css

css
```
.search-sort input {
  max-width: 300px;
}
```

```
#sortBtn {
  border-radius: 0;
}

.premium-label {
  align-self: flex-start;
  background-color: hsl(91, 70%, 45%);
  color: white;
  font-size: 11px;
  font-weight: bold;
  text-transform: uppercase;
  padding: 2px 8px;
  margin-bottom: 8px;
}
```

script.js (new file)

```
js
// TASK 3 - Live search, price sort and Premium label (plain JavaScript)

// Elements that already exist on the page
const grid     = document.getElementById('productGrid');
const searchBox = document.getElementById('searchBox');
const sortBtn   = document.getElementById('sortBtn');
const message   = document.getElementById('noResults');
const radios    = document.querySelectorAll('input[name="category"]');
const cards     = Array.from(grid.querySelectorAll('.product-item'));

const PREMIUM_LIMIT = 13 * 100;   // N x 100, N = 13 -> Rs. 1300
let ascending = true;           // direction of the NEXT sort click

// ---------- helpers: read everything from the card itself ----------

function getName(card) {
 return card.querySelector('.product-name').textContent.toLowerCase();
}

function getPrice(card) {
 // "Rs. 1,999" -> 1999
 const text = card.querySelector('.card-body p').textContent;
 return parseInt(text.replace(/[^0-9]/g, ''), 10);
}

function getSelectedCategory() {
 // the radio ids are: all, tops, bottoms, outerwear, accessories
 return document.querySelector('input[name="category"]:checked').id;
}

// ---------- search (works together with the CSS category filter) ----------

function applyFilters() {
 const text = searchBox.value.trim().toLowerCase();
```

```
  const category = getSelectedCategory();
  let visibleCount = 0;

  cards.forEach(function (card) {
    const nameMatches = getName(card).includes(text);
    const categoryMatches = (category === 'all') || (card.dataset.category === category);

    // CSS already hides cards of the wrong category.
    // The script hides cards whose name does not match the search.
    card.classList.toggle('d-none', !nameMatches);

    if (nameMatches && categoryMatches) {
      visibleCount++;
    }
  });

  // No match: show the message instead of the grid
  if (visibleCount === 0) {
    message.classList.remove('d-none');
    grid.classList.add('d-none');
  } else {
    message.classList.add('d-none');
    grid.classList.remove('d-none');
  }
}

searchBox.addEventListener('input', applyFilters);

// the category can change too, so check the message again
radios.forEach(function (radio) {
  radio.addEventListener('change', applyFilters);
});

// ---------- sort by price (moves the existing cards) ----------

sortBtn.addEventListener('click', function () {
  const sorted = Array.from(grid.querySelectorAll('.product-item'));

  sorted.sort(function (a, b) {
    return ascending ? getPrice(a) - getPrice(b) : getPrice(b) - getPrice(a);
  });

  // appendChild moves an element that is already in the page
  sorted.forEach(function (card) {
    grid.appendChild(card);
  });

  sortBtn.textContent = ascending ? 'Sort by price (low to high)'
                                  : 'Sort by price (high to low)';
  ascending = !ascending;
});

// ---------- Premium label, added when the page loads ----------
```

```
cards.forEach(function (card) {
  if (getPrice(card) > PREMIUM_LIMIT) {
    const label = document.createElement('span');
    label.className = 'premium-label';
    label.textContent = 'Premium';
    card.querySelector('.card-body').prepend(label);
  }
});
```
